### **GALLAGHER ASPHALT GOES GREEN WITH RENEWABLE ENERGY CERTIFICATES**

Thornton, IL — Gallagher Asphalt Corporation announced today that it has entered into a contract with Constellation Energy (NYSE: CEG) to purchase Renewable Energy Certificates (RECs) to match 10% of its electricity use from March 2011 through May 2014.

The RECs supplied by Constellation Energy are Green-e Energy Certified and sourced from wind energy facilities located throughout the United States. Throughout the term of the contract, 10% of the electricity Gallagher Asphalt uses at the contracted facilities will be matched with RECs. Each REC represents the positive environmental attributes of 1 megawatt hour (MWh) of electricity generated by a renewable power plant, and is retired on behalf of customers wishing to promote their environmental commitment. Through the purchase of RECs, Gallagher Asphalt and Constellation Energy are supporting the operation and development of facilities that generate clean, renewable energy.

“Constellation Energy is pleased to support the sustainability goals of our customers,” said Michael Smith, senior vice president of green initiatives for Constellation Energy. “Their voluntary actions help to reduce pollution and encourage the use of clean renewable fuels demonstrate a sincere commitment to the environment.”
